CMEF- Asia Pacific's medical industry platform serving the entire value chain for the healthcare market, the industry assembly of technology innovation, trading, learning and networking

The China International Medical Equipment Fair (CMEF) was launched in the year 1979 and is held twice every year once in spring and the other in autumn, including exhibitions and forums. After 40 years of self-improvement and continuous development, the CMEF has now become one of the world's leading global integrated service platforms in the value chain of medical devices, covering products and technology, new product launches, procurement and trade, scientific collaboration, academic forums, brand promotion, education and training. The fair widely covers more than ten thousand products, including medical optical and electro-medical devices, smart health-care and wearable equipment, and services including medical imaging, medical examination, in-vitro diagnostics and hospital construction. In recent years, the CMEF has persistently maintained its growth, having innovatively introduced more than 30 subdivided industrial clusters, such as artificial intelligence (AI), computer tomography (CT), Magnetic Resonance Imaging (MRI), Operating Room, Molecular Diagnosis, Point-of-Care Testing (POCT), Rehabilitation Projects, Rehabilitation Assistive Devices and Medical Ambulances, presenting cutting-edge scientific achievements in the medical industry.

As of now, more than 7,000 medical device manufacturers from over 30 different countries and regions have annually exhibited their products and services at the CMEF. For trading and exchanging of medical products and services, about 2,000 specialists and talents and almost 200,000 visitors and buyers including government procurement agencies, hospital buyers and dealers from over 100 countries and regions gather at the CMEF.
