Cutting, welding & joining, surface treatment, furnace & heat treatment, measurement & testing, industrial environment protection & energy saving & recycling technology, light metal trade, services & consultancies, etc.*

### What's new at ALUMINIUM CHINA 2020 ?

Aluminium CHINA 2020 will highlight automotive light-weighting applications to provide multi-material, multi-process and multi-technology solutions. To enhance networking opportunities and facilitate education within the industry, the show will integrate factory tours that will allow international visitors to collect first-hand information on potential China suppliers. A comprehensive conference program will also be embedded into the show, to cater to producers keen to revolutionize their product offerings or make bold technical advancements.

### ALUMINIUM CHINA 2020

- Showcasing aluminium industry development trends. Comprehensive analysis of new performance capabilities, technologies, applications and markets of aluminium materials
- Bringing together purchasing managers from transport, consumer electronics, packaging, construction and other end user industries. A powerful platform to promote cooperation between aluminium enterprises and downstream users.
- Auto users get the first look at automobile lightweight products for downstream and top industrial technologies.
- Come face-to-face with a high concentration of materials suppliers to help to capitalize on dynamic business opportunities in new fields.
- A powerful convention of high-quality buyers. Business matchmaking services will help you assess new international requirements and connect directly with target customers.

## Why are more and more people visiting ALUMINIUM CHINA ?

To meet over 600 exhibitors from every link along the aluminium industry supply chain in China and abroad

Exhibitors will represent the following sectors:

- Raw materials
- Semi-finished and finished products
- Aluminium products for different applications
- Surface treatment solutions
- Casting, extrusion, rolling solutions
- Light-metals
- Services & consultancies
- Industrial environment technologies

### Concurrent Event:

1. **Light Weight Asia 2020 - One-stop purchasing platform for automobile manufacturers, logistics and urban public traffic system buyers.** Ideal for designers, researchers and specialist to conduct technical exchange and uncover key industry trends. 12,000 sqm exhibition area explored by more than 6,000 high-quality buyers representing automobile manufacturers as well as logistics and urban public transportation systems.

Exhibiting top local and international lightweight automotive finished products, auxiliaries and high-performance materials, as well as manufacturing and processing solutions along the entire industry chain.
